

AHMAD YASER KHALAF

Frontend Developer | React.js & Next.js

Beirut, Lebanon | ahmadkhalaf517@gmail.com | +961 76 661 986 | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building scalable, responsive web applications with React.js and TypeScript, including 1+ year developing SSR/SSG applications with Next.js. Owned a client-facing production platform end-to-end for 5+ years — shipping features, fixing bugs, and improving performance — and mentored a junior developer joining the team. Delivered finance-oriented tools for freelance clients, including payment and subscription tracking, and financial/operations reporting systems. Skilled in translating Figma wireframes into production-ready, reusable UI components, integrating REST APIs with backend services, and implementing state management with Redux Toolkit, Zustand, and Context API. Experienced with Material UI, Tailwind CSS, Axios, and React Query, and comfortable using AI coding assistants (GitHub Copilot, Claude) to boost productivity while rigorously validating generated code for security, maintainability, and coding standards. Fluent in Arabic and English, with strong Agile/Scrum collaboration and communication skills.

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR/SSG, App Router), JavaScript (ES6+), TypeScript, HTML5/CSS3, Responsive Web Design

State Management: Redux Toolkit, Zustand, Context API, React Hooks

Data Fetching & APIs: Axios, React Query (TanStack Query), RESTful API integration, Authentication & Authorization, Postman

UI Libraries & Styling: Material UI (MUI), Tailwind CSS, shadcn/ui, Figma-to-code implementation

Testing & Quality: Jest and React Testing Library (foundational knowledge), code reviews, debugging & defect resolution

Build Tools & DevOps: Vite, Webpack, Git/GitHub, CI/CD (GitHub Actions), Docker (basic)

Backend & Databases (supporting): NestJS, Express, PostgreSQL, MySQL, MongoDB, Python (Flask & FastAPI)

AI-Assisted Development: GitHub Copilot, Claude — used to accelerate delivery while validating generated code for correctness, security, and coding standards

Practices: Agile/Scrum, secure frontend development, cross-browser compatibility, performance optimization

PROFESSIONAL EXPERIENCE

Freelance Developer

2025 – Present

Remote

- **Delivered client web projects** including a records management platform and a cash-tracking application, built with React, TypeScript, and Vite.
- **Built a restaurant point-of-sale (POS) system** using Electron and React to process orders, track expenses, and generate monthly reports, with secure IPC communication between frontend and backend processes.
- **Built and styled interfaces** with Material UI and Tailwind CSS; managed state with Zustand and Redux Toolkit; handled data fetching with Axios and React Query.
- **Optimized application performance** and delivered production builds for Windows, macOS, and Linux.

Full Stack Developer (Frontend-Focused) — SCHEDEX

Jan 2021 – Apr 2026

Beirut, Lebanon (Remote) — Full-Time

- **Owned end-to-end delivery** of the client-facing web application for the first 2.5 years as the primary frontend developer — shipping new features, fixing bugs, and improving performance across the product.
- **Designed and developed** responsive frontend features and interfaces with React and TypeScript, ensuring cross-browser compatibility across mobile, tablet, and desktop.
- **Built and maintained** a library of reusable React components and custom hooks, reducing duplicate code and speeding up delivery across multiple product modules.
- **Integrated REST APIs** implementing authentication/authorization and CRUD workflows.
- **Contributed to backend API development** in NestJS and collaborated with backend engineers on PostgreSQL data modeling and system architecture decisions.
- **Mentored a junior developer** after they joined the team — reviewing code, sharing React/TypeScript best practices, and helping them ramp up on the codebase and workflows.

- **Used AI coding assistants** (GitHub Copilot, Claude) to accelerate development, consistently reviewing and validating generated code for correctness, security, and adherence to team coding standards.
- **Participated in** sprint planning, stand-ups, and retrospectives within an Agile/Scrum team.
- **Partnered with UX/UI designers** in Figma to translate wireframes into pixel-accurate, production-ready interfaces.
- **Supported CI/CD deployment** pipelines using GitHub Actions and troubleshoot build and release issues.

Freelance Software Developer (C# / .NET)

2018 – 2020

Remote

- **Built and delivered multiple Windows Forms desktop applications** in C# for small business clients, including point-of-sale systems, an ISP customer management platform, and a travel agency reservation system.
- **Developed a customer payment and subscription tracking system** for an Internet Service Provider (ISP), enabling staff to manage customer accounts, monitor subscription status, and record payments.
- **Built a reservation and financial tracking application** for a travel agency to manage bookings and offered packages, and track costs, profits, and payments, with automated report generation.
- **Implemented database connectivity and core business logic** across all applications using SQL-based data storage.

ADDITIONAL PROGRAMMING EXPERIENCE

- **Java:** Applied object-oriented programming, data structures, and algorithms in academic and mobile applications.

EDUCATION

Bachelor of Science in Computer Science — Lebanese International University, Beirut, Lebanon — 2017

CERTIFICATIONS & TRAINING

- Full Stack Web Development — Digital Hub, Lebanon, 2026 (In Progress)
- Cybersecurity — Al Afaq Institution / Witness Association, Lebanon, 2024
- Web Development — Witness Association, Lebanon, 2023
- Robotics — Witness Association, Lebanon, 2022

LANGUAGES

Arabic: Native **English:** Professional Working Proficiency
